NOTES: The board is large, so to move around, use the Zoom box on the bottom right.

To add a comment, click the left side and the one called "text" which allows you to add a sticky note. When the colour box appears, click the sticky note to add text.

GIP Discussion Board #2 Feb 2023

What can NNEdPro's role be in the development of, spread and education around precision nutrition? (It may be useful to think about strengths, weaknesses, opportunities, and threats)

Strength
Global Network to
provide space for
critique, debate and
discussion

Provide ongoing assessment of actionable research.

Promote debate and discussion.

STRENGTH
Access to potential
database to explore
topics

Enable truly crossdisciplinary research that looks at both precision

nutrition and its

delivery via food

ingredients

Consider the impact of food component's qualitative differences due to means of production and source etc

A weakness is finding

a focus/target within

PN given the groups

overall broad aims

target approach for a specific

topical example eg Na, Vit D

etc that can be tackled across

research, policy, practice, and

case examples etc

NNEdPro has members working in the research, policy and application of PN - this is a huge strength of the group

Opportunities

challenge in

producing consensus

papers

Opportunity: Summer School spin-off focus on precision nutrition

Advocate for precision nutrition approaches in AI

NNEDPRO can explore an editorial issue with BMJNPH

Multi - professional working to clarify positions to breakdown professional silos

Target upstream / top
down. Make sure all
those policy and eg
national dietary
guidelines working
groups have an
understanding of
precision medicine

Weakness (not limited to NNEdPro): defining the area

A challenege within the world of PN are the strong opinions of those who believe that it is the future compared to those who believe population health is the most important

How can we make it easy like ABC for healthcare professionals to implement PN and also to translate these into practical dietary practices...(imagine a homemaker preparing meals based on PN for each member)

Strength support equitable and broaderd adoption.
