Introduction

The NNEdPro Global Institute for Food, Nutrition and Health and the International Academy of Nutrition Educators are excited to announce the forthcoming **"Democratising and Decolonising Food and Nutrition: From Science to Society"** Summit. This Summit is dedicated to fostering a more inclusive, equitable, and collaborative approach to food and nutrition research, education, practice, and policy worldwide.

At the heart of this Summit is the concept of enhancing global collaboration. *'Democratising'* involves expanding the dialogue/conversation to include diverse perspectives and viewpoints to bridge the gap between traditional knowledge systems and contemporary scientific research. We recognise the importance of integrating diverse viewpoints and expertise and are keen to establish a space where every voice is included, acknowledged and addressed. *'Decolonising'* involves exploring the current food and nutrition landscape, acknowledging the historical influence of specific nations and institutions on research directions, educational content, policy development, and clinical guidelines. Our objective is to foster an inclusive dialogue that respects and incorporates the contributions of all stakeholders, with a particular emphasis on those from historically underrepresented regions and communities. The Summit will highlight the significance of integrating indigenous and local food practices with global nutrition science by focusing on middle-income countries and their valuable insights. This approach aims to enrich our understanding and tackle disparities within the field.

By utilising a case-based methodology and a constructive outlook, the Summit is set to identify critical areas for growth and collaboration across the four foundational pillars of research, education, practice, and policy. Through carefully examining existing studies and successful models, we aspire to uncover strategies that promote a more inclusive, equitable approach to food and nutrition. **The Summit's ultimate vision is to pave the way for a future where the global food and nutrition community works hand in hand, leveraging diverse knowledge and perspectives.** This collaborative effort seeks to ensure that our collective approach to food and nutrition is informed by a wide range of voices, driving forward with inclusivity and equity at the forefront, effectively bridging the gap between science and society.

About Us

NNEdPro is an award-winning, international, interdisciplinary and research-intensive think tank anchored in Cambridge, with principal UK research hubs at Ulster University (School of Biomedical Sciences), Imperial College London (School of Public Health) and the University of Cambridge (School of Social Sciences). NNEdPro serves as an independent research organisation with strong education and training as well as knowledge network functions, operating digitally across ten regional networks across six continents bringing together doctors, dietitians, nutritionists, other healthcare professionals, educators and researchers.

A series of collaborations and strategic partnerships enables us to bring together the best of education, research, evaluation, and advocacy, particularly in nutrition related aspects of health and food systems. Within this framework we conduct a range of training courses, primary research studies and syntheses to fill key evidence gaps. Read more about our work here. Our aim is to improve nutrition-related health outcomes in line with the United Nations' Sustainable Development Goals and the Decade of Action on Nutrition 2016–2025.

Vision

To establish the NNEdPro Global Institute for Food, Nutrition and Health as a world-leading and highly innovative think-tank, training academy and knowledge network, bringing together the best of education, research, evaluation and advocacy, particularly in Nutrition-related aspects of health and healthcare systems.

Mission

To tackle the global crisis of malnutrition (in all its forms) by conducting research and delivering education in gap areas, empowering professionals, policymakers and the public; to facilitate sustainable improvements in nutrition and health behaviours, accelerating progress towards the United Nations 2030 goals.

About the Events

The NNEdPro International Summit on Food, Nutrition and Health is a leading annual scientific meeting. The 2023 Summit considered 'Sustainable Resourcing For All In Food & Nutrition Security: Creative solutions for healthy & resilient populations', which highlighted the need to consider the inequities that exist within the food and nutrition landscape, leading us to fully explore the theme of 'Democratising and Decolonising Food and Nutrition: From Science to Society' in 2024.

This will take the form of a hybrid pre-summit workshop and roundtable discussion in Belfast, on 1st July 2024, and a main Summit event, also in a hybrid format, in Kolkata, India, from 17th to 20th December. These events will bring together the collective views of our regional networks spanning over 65 countries as well as a multitude of organisations, giving even wider geographical and disciplinary coverage.

Registration includes access to plenary sessions, interactive panel discussions and abstract presentations showcasing work from all NNEdPro Regional Networks and key collaborators, with 40+ hours of engaging content!

Event Highlights

Bringing together expert speakers from across 6 continents

Plenary sessions and interactive panel with key opinion leaders on global systems perspective

Scientific poster competition, workshops & networking opportunities

9am to 6pm	Plenary Sessions Exhibition Ticketed Side Events & Activities
20 December	
9am to 1pm	Plenary Sessions Closing Ceremony

Supportership Benefits

As a supporting organisation, you will be crucial in promoting nutrition education and providing applicable skills to students and professionals while gaining IANE membership registrations and visibility opportunities at the Summit. You can extend those registrations to your organisation or donate them as scholarships.

Affiliate Memberships with the International Academy of Nutrition Educators

IANE is a membership scheme for professionals and organisations interested in developing and delivering high quality nutrition education and evaluating its impact, particularly on healthcare practices. With one year of membership as an affiliate member, you and your collaborators will gain access to benefits such as one to one mentoring sessions, live webinars and journal clubs, forum discussions, discounts and more. The number of places will vary according to your level of support.

Places and visibility plan at the 10th NNEdPro International Summit on Food, Nutrition and Health

The International Summit on Food, Nutrition and Health is a leading annual international scientific meeting in nutrition research and scientific dialogue, attracting delegates who are key opinion leaders in the field from all over the globe. The 10th Annual NNEdPro International Summit is planned to be held in Kolkata, India and aims to bring together experts from across the globe to strengthen and promote international initiatives and discuss issues centred on the main theme of sustainable resourcing for all in food and nutrition security. The number of places will vary according to your level of support.
